

University of Essex

RIS

Annual Research Review

November 2022

About the RIS

The Research Information System delivers important benefits which include:

- The automatic searching of publications from a range of external sources and a simple process to deposit them into the Research Repository.
- A single place where researchers can manage grants, professional activities, teaching responsibilities and supervision, publications and impact.
- A way to manage and edit external web profiles.
- A platform in which REF submission and annual research review can be managed with minimal re-keying of data or completing of forms.

About this guide

This guide describes the process completing your Annual Research Review in the RIS.

By the end of the guide you should be able to:

- **Login** to the System
- **Complete** your monitoring form
- **Submit** for review by your department

Your Submission

For this review you will be asked to:

- Confirm you are aware of the University's [Code of Good Research Practice, Policy and Procedure for managing and storing security-sensitive research material](#) and the [Open Research Position Statement](#).
- Check that RIS holds details of your published and deposited outputs since 1 January 2021 and select and order all those that are eligible for submission in the REF, i.e. outputs that are the product of research, briefly defined as a process of investigation leading to new insights, effectively shared.
- List any other outputs, including working papers, or projects that are likely to result in publications and that you would like to bring to your Department and the University's attention
- Check your list of research funding Awards and tell us about any grant applications made, pending or planned.
- Check your list of Professional Activities and select any indicators of peer esteem and national and international recognition that you have received since 1 August 2020.
- Select Impact items, in particular ones that may support an impact case study for the next REF.
- List any knowledge exchange activities that you are currently undertaking or have planned.

Essex Research Information System Development Server Login

Enter your University of Essex credentials and click Login:

LOGIN

Please login using your normal university login.
Do not add @essex.ac.uk to the username.

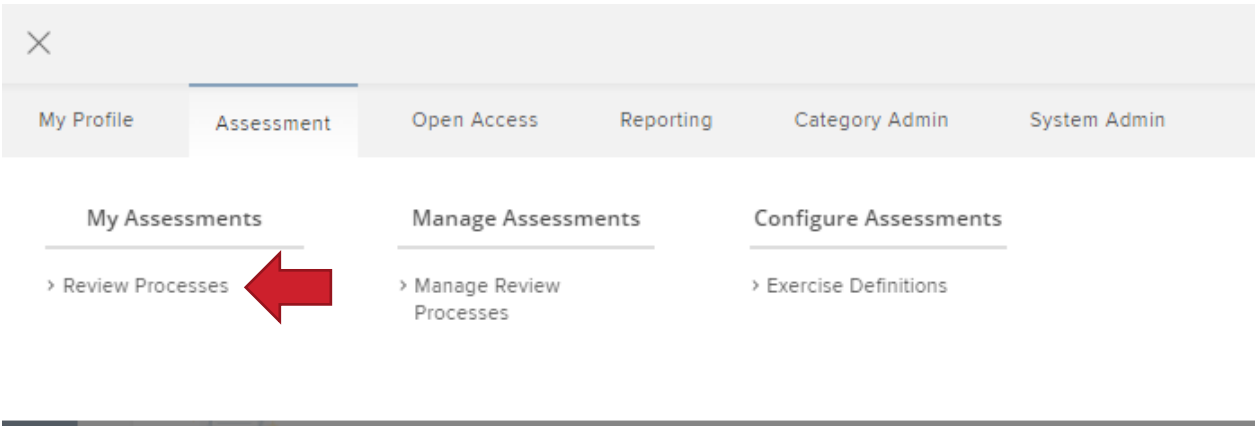

For support please email reors@essex.ac.uk

Log In

Login at: <https://ris.essex.ac.uk>

Your normal university login is all you need.

You don't need the VPN to access the RIS. It works from anywhere with an internet connection and in most browsers (Microsoft Edge, Chrome, Firefox, Safari).

How to begin

To begin Select from:

Menu > Assessment > My Assessments > Review Processes

You will also be prompted to start, complete or take action on an exercise from **My Actions** on the home page

My review processes

The following review processes have been made available to you for completion.

- On-screen guidance text is available to guide through the "what" and "how" for each section.
- Once you have finished, either create an export of your completed response or mark as ready for the next stage (if there is one).
- To get started, select from the list below.

Current Review Processes

Annual Research Review 2022-23

In draft

The University is required to submit 100% of our 'independent researchers' (ASER staff and ASR staff on Grade 9 or above) to the REF. As a means of assessing progress towards this, Senate and Council approved a set of norms that all ASER staff and staff on ASR contracts at Grade 9 or above should have the equivalent of three published research outputs assessed at a minimum of 3* by the end of the REF assessment period (subject to the normal allowances for individual staff circumstances such as ECR status; maternity leave; part-time contract; certificated sickness absence; etc).

It is important to have an accurate record of your preparedness for REF submission. This helps to ensure that support is provided in a timely fashion when necessary. In addition, departments have said they find the reports very helpful as a means of keeping in detailed touch with what colleagues were doing and intending to do, and of gathering information that they might otherwise not have.

Continue review process

Start your submission

Review the guidance and click **Start** or **Continue review process**

Note: You can work on the submission over time and stop and return at any point.

Research Publications for REF
In draft

1 item added - Please check the list of your research outputs and select all published research outputs which you believe are eligible to be submitted in the next REF. These are details of your published outputs since 1 January 2021 which are held in the University's Research Information System. If any of your research outputs which have been published since 1 January 2021 are missing, please add them to the RIS (Menu > Publications). They will then be available for you to select should you wish to do so.

Guidance

Please click the "Select items" button and select all published research outputs which you believe are eligible for submission to the next REF, i.e. outputs that are the product of research, briefly defined as a process of investigation leading to new insights, effectively shared. A full definition of research for the REF can be found in Annex C of the [REF2021 Guidance on Submissions](#). Once you have selected your outputs, please order them according to quality, from the highest quality to the lowest quality, using the "Order items" button in the List Summary on the right-hand side of the screen. It is important that you use the "REF indicators of quality" in ordering your outputs, not relying simply on the impact factor or ranking of the journal. If you are in any doubt about how to rank your outputs, you should seek guidance from your Director of Research or other Departmental/School nominee.

***REF indicators of quality**

4*: Quality that is world-leading in terms of originality, significance and rigour.

3*: Quality that is internationally excellent in terms of originality, significance and rigour but which falls short of the highest standards of excellence.

2*: Quality that is recognised internationally in terms of originality, significance and rigour.

1*: Quality that is recognised nationally in terms of originality, significance and rigour.

Once you do this you can no longer make changes. It is important that you do this, otherwise your department can't access your submission to start reviewing it.

REVIEW PROCESSES >

Annual Research Review 2022-23

Departmental Review

ⓘ This review process cannot currently be edited. ←

The University is required to submit 100% of our 'independent researchers' (ASER staff and ASR staff on Grade 9 or above) to the REF. As a means of assessing progress towards this, Senate and Council approved a set of norms that all ASER staff and staff on ASR contracts at Grade 9 or above should have the equivalent of three published research outputs assessed at a minimum of 3* by the end of the REF assessment period (subject to the normal allowances for individual staff circumstances such as ECR status; maternity leave; part-time contract; certificated sickness absence, etc).

It is important to have an accurate record of your preparedness for REF submission. This helps to ensure that support is provided in a timely fashion when necessary.

In addition, departments have said they find the reports very helpful as a means of keeping in detailed touch with what colleagues are doing and intending to do, and of gathering information that they might otherwise not have. The information can help not only with other elements of the REF, i.e. Impact Case Studies and the Environment Statements, but also with work allocation and Incentives.

Guidance

- You need to confirm you are aware of the University's [Code of Good Research Practice](#), [Policy and Procedure for managing and storing security-sensitive research material](#) and the [Open Research Position Statement](#). Please use the 'Add policy confirmation statements' button below to complete the statements to confirm that you are aware of the policies. This enables the University to comply with Government guidance to HEIs.
- Check that RIS holds details of your published and deposited outputs since 1 January 2021 and select all those that are eligible for submission in the REF, i.e. outputs that are the product of research, briefly defined as a process of investigation leading to new insights, effectively shared.
- List any other outputs, including outputs that have been submitted for publication but not yet accepted, working papers, and projects that are likely to result in publications which you would like to bring to your Department's and the University's attention
- Check your list of research funding Awards and tell us about any grant applications made, pending or planned.
- Check your list of Professional Activities and select any indicators of peer esteem and national and international recognition that you have received since 1 August 2020.
- Select Impact items, in particular ones that may support an impact case study for the next REF.
- List any knowledge exchange activities that you are currently undertaking or have planned.

What happens next?

Your submission will be reviewed by your department.

They may pass it back to you for updates or changes in which case your submission will become available for you to edit again.

When you have made changes mark it as complete and move it to departmental review again.
